AB SPECIALTY SILICONES increases manufacturing and storage capacity of specialty silicone raw materials

Waukegan, Illinois, May 1, 2018

AB Specialty Silicones has completed a significant plant expansion in a continuing effort to meet the growing needs of the silicone marketplace. At the center of the project is a new reactor that dramatically increases the company's annual specialty fluid production capabilities. To accommodate the manufacturing gain, storage for raw materials and finished products have also tripled in capacity.

With more improvements planned for 2018, AB Specialty Silicones continues to invest in the Waukegan plant as well as its future in order keep up with the company's growth as well as the increasing demand for silicone raw materials worldwide. Aside from production, the location also houses a research and development laboratory specializing in custom silicone development and over 200,000 sq feet of warehouse space. AB Specialty Silicones prides itself on customer service and custom solutions.

About AB Specialty Silicones

AB Specialty Silicones is a US Manufacturer and Worldwide Distributor of specialty silicone chemical raw materials. With customer focus at the forefront, the goal is to be the one source for all of your silicone raw material needs—providing the highest quality materials, service and technical expertise available. Manufactured under Andisil®, the company offers a broad product catalog serving many industries: Personal Care, Chemical Manufacturing, Dental & Medical, Mold Making, Electronic Encapsulation, Adhesives & Sealants, Coatings, Gypsum, Pressroom, Rubber, Roof Coatings, Mineral & Fiber Treatment et al.
