### **AB SPECIALTY SILICONES prepares to launch resin blends with unique carriers at Suppliers' Day**

Waukegan, Illinois, May 1, 2019

AB Specialty Silicones is launching a new line of silicone resin blends that combine unique carriers with trimethylsiloxysilicate (TMS). Carrier fluid selection can be volatile or non-volatile and when combined with the other ingredients in your formulation have a large effect on the film properties of your final product. These blends are multi functional; providing multiple benefits in a single ingredient. At NYSCC Suppliers' Day, May 7th & 8th in New York, Booth #1366, AB Specialty Silicones will introduce their new line of TMS resin blends formulated to meet industry needs.

Silicone resin blends are not only desirable due to their performance within a formulation, but also for how the manufacturing issues from handling the neat resin can be avoided with already blended material. AB Specialty Silicones is introducing two resin blends that are phenyl based for applications such as lipsticks or hair care, where shine is desirable. Another notable addition is our cyclic free blend that offers similar performance to its D5 counterpart.

#### About AB Specialty Silicones

AB Specialty Silicones offers the personal care marketplace an extensive line of silicone based ingredients as well as the ability to custom formulate raw materials and blends to specifically suit your needs. AB Specialty Silicones offers the highest degree of personal service and flexibility to meet each customers' requirements.
